VX9 Förj

THE DIFFERENCE BETWEEN ATOOL AND A WEAPON.

Materials emerging from the blacksmith's forge are hardened to withstand tremendous challenges, but also shaped to the exact specifications of their owner. The Förj harnesses full Microsoft® Windows computing power in a mobile environment, optimizing application and network management compatibility, while remaining flexible enough to run multiple advanced applications, with either Windows XP Professional MUI or Windows Embedded Standard.

A 12.1" touch screen display, with an available backlit energy-efficient LED configuration, provides exceptional operator visibility. Radio communications are delivered on the move with optional Bluetooth, WLAN or WWAN radio. And it's all packaged in an IP 54-rated magnesium enclosure that's built to thrive in the toughest environment — yours.
